

A 350

THE PRODUCTION LINE MACHINE.

*An example of A350 fitted with
Hydraulic pump unit PHU1.*

Dimensions:
L= 1117 mm (44")
W=370 mm (14 3/4")
H=210 mm (8 1/4")
Weight: 66 kg (146 lbs)

Production Line Machine.

A perfect machine for line production, the low weight and small outer dimensions still makes it extremely portable.

Rigging screws can be swaged assembled.

Swaging Range: 2,5-16 mm wire. (3/32" - 5/8")

Typical applications:

- Standing rigging and lifelines for sailboats.
- Architectural, like balustrades and railing.
- Good for medium size glass facade projects.
- Often used to build support structures for membrane roofs and tents.
- Structural rigging for sail-roofs and sail-shades.
